Objet : Anse à l'Orme

Reference the Master Plan, Anse a l'Orme.

Item (1) : Preserve natural areas of interest.

Item (2) : Integrate road and development projects INTO the natural settings.

HOW on earth will you preserve natural areas if you are deloping them and integrating road and development areas?

The two things are diametrically opposed.

These are the only areas left which are more or less untouched, and plenty of those segments are in the hands of developers.

What do you want: Concrete over the whole of Montreal Island? Once it is concreted over it cannot be undone.

Think again.
