

On behalf of survivors and families of survivors of the atrocities committed at the Allen under MK-Ultra programs, Including Duplessis Orphans and Indigenous children, I am requesting an investigation into unmarked gravesite behind the stables and in and around the pool of the Allan Memorial Institute, including the following specifics:

a) that proper ground penetrating radar be used prior to any development of the site

b) that if bodies are found, forensic investigation will be conducted and development and demolition will not take place till this work this is properly done to the satisfaction of all parties.

c) that if gravesite is found, it preserved for honouring and remembering for future generations to come.
