

I lived my entire youth in front of the elementary school. My sister is still living there and her biggest fear is that the school could move. Why? Because it's the best thing that can happen to you to live next to a school.

You have all your afternoons, evenings, weekends and holidays in total silence. There is nobody. And any kind of noise or activity related to a school is concentrated in 15 minutes in the morning and 15 minutes at lunch time. Are people really concerned about that?

There is a lot of miss-information for people living around the area where the 2nd school will be built. And it's so unfortunate.

When the 2nd school will be built, any kind of traffic or noise related to the school will be diluted and according to my experience, it's not a problem.

I live on Grande Allee and I can confirm that we will walk with our daughter every day to the new school. Another reason for reducing the traffic flow!
