

I strongly object to the site chosen for the construction of the new school for the following reasons :

This is about the worst spot in terms of traffic congestions leaving the island, insufficient space for the projected building, further reduction of green space, lack of safety for the children, since this area is already a high traffic spot.

We all know that the city wants to use space owned by Verdun, but if a proper campaign would be launched, I am certain that developers such as Mr. Gewurz would be proud to donate land and have the school named after them. There is still land available ( across from GRAVEL , near the Bell Center etc. much better suited for the location of a new school.
