

I, like many of my neighbours, find the location of the school in the proposed triangle unacceptable. The location is adjacent to a **very busy** roundabout, there are **not enough** parking spots for the parents delivering children to the school and the designated (school) surface area is very small and encroaches on the park. Since a third school should also be built on the Island to accommodate the increasing population, a more appropriate lot should be found on the island (**even if it has to be bought**) so that only **one larger** school should suffice.

Yours sincerely

Dunja Vukadin
